## ABOUT

I am a software engineer with solid expertise in backend and creation of scalable software. I have extensive experience using different languages and tools, as well as communication skills that allow me to collaborate with multidisciplinary teams. My motivation and dedication to work with what I love are the pillars that drive my career.

## WORK EXPERIENCE

### Freelance at Scanfood, 11/2023 - 01/2024

I developed a platform from scratch for registering supermarket items using Node.js, Svelte, and PostgreSQL. Additionally, I integrated it with a delivery system that processed orders for these items.

### Bluup, 11/2022 - 10/2023

I was technically responsible for creating a marketplace from scratch between startup founders and investors using Node.js, Golang and Github Actions for CI/CD.

### One Blue, 06/2022 - 11/2022

I created and maintained several microservices for a social network in a Node.js environment with Docker and Kubernetes on Azure, in addition to the platform's web interface.

## SKILLS

- Golang
- Node.js
- Elixir
- PostgreSQL
- Docker

## EDUCATION

Bachelor's degree in Computer Science, Federal University of Pelotas, 2022 - 2025

## LANGUAGES

- English - Intermediate
- Portuguese - Native

## PROJECTS

- [Trendle](#) - A self-hosted, realtime polling system written in Go.
  - Volko - A opinion forum built on top of Phoenix (Elixir) and powered by Trendle.
-
